

MIDI LOGGER GL840-M / GL840-WV

Isolated/Universal Input, Standalone Multi-Channel Datalogger.
Setting New Heights in Data Recording.

GRAPHTEC

FEATURES

- Flexible input system for wide array of applications
- Wireless LAN capability for remote monitoring and remote datalogging system
- Extended memory capacity using SD memory card
- Maximum sampling interval of up to 10ms

**10-Channel
Portable Model**
midi LOGGER GL240

Multi-Input Model
midi LOGGER GL840-M

**High Voltage
Withstand Model**
midi LOGGER GL840-WV

GRAPHTEC

GL840 series

Setting New Industry Standards for It's Class

Accommodates a wide variety of measurements

Multifunction analog input ports

Contains a highly isolated input mechanism which ensures that signals are not corrupted by noise from other channels. The GL840's inputs are suitable for combined measurements from voltage, temperature, humidity, logic, and pulse signals.

4 channels of Logic/Pulse inputs

Supports 4-channel logic or pulse signal inputs. Pulse mode allows cumulative, instant, or rotational values for industrial measurement capability with speed and flow.

Voltage	Ranges from 20mV to 100V	Pulse	4 channels* Accumulating, Instant or RPM
Temp.	Thermocouple type: R, S, B, K, E, T, J, N, W RTD types (for GL840 only): Pt100, JPt100, Pt1000	Logic	4 channels*
Humidity	0 to 100%RH - using optional sensor (B-530)	* Requires optional input/output cable (B-513). Select either Pulse or Logic input.	

Large easy-to-read 7-inch wide color LCD

Carries a clear 7-inch wide TFT color LCD screen (WVGA: 800 x 480 dots). Monitoring data are displayed in waveform or digital form option. Parameter settings can be displayed on the screen.

Waveform display (Analog + Digital)

Digital display

Dual display (Current + Past)

Waveform display (Analog only)

Useful functions

Alarm output function

Based on set conditions for each channel, alarm signals can be placed using the four channel alarm output ports.*

* Input/output cable (B-513 option) is required to connect the alarm output ports to external buzzer/light mechanism.

USB drive mode

USB drive mode function enables data to be transferred to the PC from GL840 by drag & drop feature.

Navigation function

Simple to use navigation screen allows setting operation for measurement and wireless LAN adapter.

Maximum sampling interval of up to 10ms

Provides faster sampling rates for voltage measurements. You are able to achieve up to 10ms sampling speed when limiting the number of channels in use.

Model	Sampling interval	10ms	20ms	50ms	100ms	200ms	500ms	1s	2s
		Number of channel							
GL840	Measuring	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
	Temperature	N/A	N/A	N/A	Yes	Yes	Yes	Yes	Yes

* This chart is applicable when the captured data is saved in the GBD binary file format. Limited sampling speed is available when digital sensors and GL100-WL are used as a remote monitoring device.

Supports large-size SD memory card for reliable long term measurement

New GL series carries two SD memory card slots for storage device. The SDHC type SD memory card is supported up to 32GB. 4GB SD memory card comes as a standard accessory installed in the first slot.

Capturing time* (When all 20 or 10 analog channels are being used with Logic/Pulse inputs turned off)

Model	Sampling	10ms	50ms	100ms	200ms	500ms	1s	10s
GL840 (20ch)	GBD format	31 days	77 days	95 days	108 days	270 days	over 365	over 365
	CSV format	3 days	11 days	16 days	21 days	54 days	109 days	over 365

* Figures are approximate. File size of captured data is 2GB in GBD or CSV file format on this chart. Sampling interval is limited by the number of channels in use (10ms: 1ch, 50ms: 5ch, 100ms: 10ch).

Ring capture function

The most recent data is saved when the memory is configured in ring memory mode. (Number of capturing data is 1000 to 2000000 points)

Relay capture function

Data is continuously saved to multiple files up to 2GB without losing any data until capturing is stopped when the memory is configured in the relay mode.

Hot-swapping the SD memory card

SD card can be replaced during data capturing when the sampling interval is 100ms or slower.

3 Types of Power Source

Choose from AC power supply, DC supply* or the rechargeable battery pack.*
* DC power drive cable (B-514) and battery pack (B-569) are optional accessories.

Networking features

Web & FTP server function

GL840 can be controlled externally via a network on the WEB browser, which also supports monitoring and transfer of signals and captured data.

FTP client function

Captured data is periodically transferred to the FTP server for backup.

NTP client function

The clock on the GL840 is periodically synchronized with the NTP server.
* The GL840 needs to be connected to a LAN environment using the available Ethernet/WLAN ports.

GL840 expands to two models for application specific use

Multi-Input Model midi LOGGER GL840-M

Suitable for temperature measurement with multiple channels.

High Voltage Withstand Model midi LOGGER GL840-WV

Suitable for stacked high voltage battery application, or high-precision temperature measurement.

Expandable up to 200 channels

Standard configuration has 20 analog input channels. It is expandable to 200 channels by adding the optional 20 channel extension terminal base unit (B-566) and input terminal units (B-564 or B-565).

The following shows how a standard configuration is expanded to a 40 channel configuration.

- Terminal unit is removed from the main body of the GL840.
- Extension terminal base unit (B-566) connects to the GL840 using the external cable (B-567).
- Terminal unit snaps onto the extension terminal base unit (B-566).
- The combined extension terminal base set (B-566) and additional input terminals (B-564 or -565) are daisy chained together.

Configuration for additional channels

Number of channels	20 channels	40 channels	100 channels	200 channels
GL840 unit (GL840-M or GL840-WV)	1 set	1 set	1 set	1 set
Connection cable (B-567-05 or -20)	N/A	1 pc	1 pc	1 pc
Terminal base (B-566)	N/A	2 sets	5 sets	10 sets
Input terminal (B-564 or B-565)	N/A	1 set	4 sets	9 sets

* Input terminal blocks for the B-564 and B-565 can be mixed together for combined configurations. However, the maximum voltage and accuracy rating for the setup will be limited to the rating of the B-564.

Offers longer cable for the input terminals

Input terminal blocks can be connected directly (in daisy chain), or using the B-565 cable(s). This allows the input terminals to be placed in separate locations according to the need of the application.

The input terminal and the GL840 main body can be extended by using an extended connection cable.

* If the signal is affected by noise, it may be required to use a slower sampling.

Withstand voltage & Accuracy		Multi-input type (B-564)	Withstand-voltage type (B-565)
Voltage	Input voltage range	20 mV to 100 V	20 mV to 100 V
	Max. voltage (Input - GND)	60 Vp-p	300 Vp-p
Temp.	Thermocouple	R, S, B, K, E, T, J, N, W (WRε5-26)	
	RTD (Resistance Temp. Detector)	Pt100 (IEC751), JPt100 (JIS), Pt1000 (IEC751)	
Accuracy	Voltage	± 0.1% of F.S.	±(0.05% of FS + 10μV)
	Temperature*	± 1.55 °C	± 1.1 °C

* Accuracy rating for K-type thermocouple at 100 °C includes reference junction compensation. Accuracy varies by the temperature levels and thermocouple types.

Three types of input systems enable measurement of various signals

Along with the basic analog signal, Logic/Pulse, and digital sensors can be all connected to monitor a variety of measurements.

Support digital sensors

Digital sensors and input terminal/adapters for the GL100 connects to the GL840 directly.

Temp/Humidity GS-TH	Acceleration/ Temp GS-3AT	Carbon Dioxide GS-CO2	Illuminance/ UV GS-LXUV	Voltage/Temp GS-4VT
Thermistor adapter GS-4TSR	Thermistor	AC current sensor adapter GS-DPA-AC*	AC current sensor	Extension cable**

* Supports up to two AC current sensors.
** Allows only one extension cable per port.

Dual port adapter connects up to two sensors for simultaneous interface

High performance software with useful functions for the PC (GL240_840-APS)

GL840 series
GL240

Ethernet or USB

PC (Software)

- Supports GL840, GL240**
Up to 10 units of GL840, GL240 and GL100 can be connected to 1 PC simultaneously. Up to 1000 channels are supported.
- Controls settings for GL840, GL240**
- Various measurement screen**
Displays data in Y-T waveform, digital monitoring, statistical calculation result. The direct-Excel function enables captured data to be written directly to an Excel file.
- File operation**
Data captured in multiple files can be merged into a single file. Using the combine function, data can be imported as a new channel overlaying on top of each other. The bind function connects the data in a time axis. When using the relay capture mode, the bind feature will append multiple files together into one large, continuous file.

- Useful functions**
- Scheduling function**
Create a schedule for your monitoring to start and stop at selected time, and set an automatic measurement schedule.
- Group function**
Multiple units can be managed, such as controlling start or stop simultaneously. Data captured by each unit is saved in a single file.
- Data format conversion**
Converts the GBD (Graphtec Binary Data) format to CSV format. The file size is reduced using the compression function saving a value at particular time point of a specified interval. Or, it will save the average, maximum, or minimum values from the specified time interval as the highlighted values.

Schedule table is able to create easily using mouse.

Saves to a single file

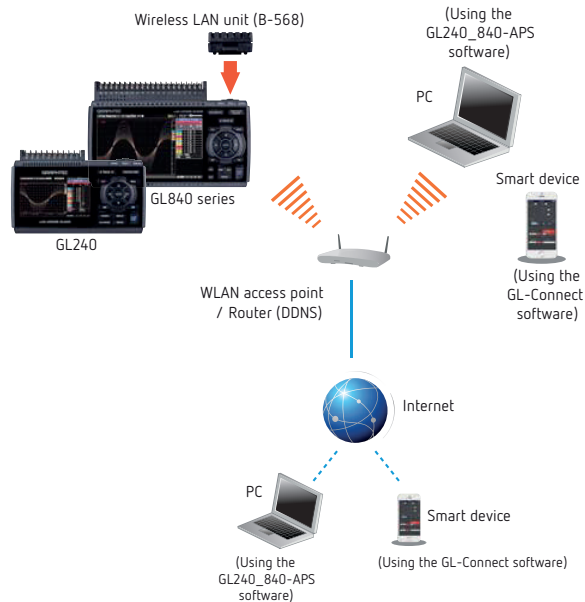

Multiple units

Wireless Measurement Using WLAN (option)

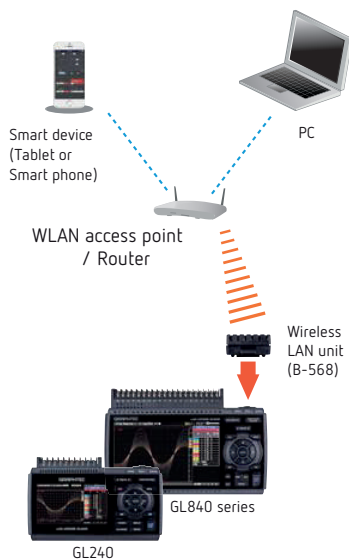

Wireless LAN option enables the wireless communication with other devices. Connects to the wireless unit remotely when set as an access point. When set as a station, PC and smart devices will be able to access the WLAN unit directly.

■ Communication with the PC or Smart device

GL840 and GL240 units can be connected to a LAN (Local Area Network) via an WLAN access point. Measured data can be monitored and controlled via a PC or a smart device using the application software. Configuration can be set via the network.

High quality performance and measurement software with useful functions for the PC & smart device environment

For PC (GL240_840-APS)

Software for the PC is included as a standard accessory.

- Monitor and save captured data remotely
- Control the GL840/GL240
- Additional functions

- Scheduling function
- Group function
- Data format conversion
- File operation
- And more!

For Smart device (GL-Connect)

Apps for the smart devices are available on the Android OS and iOS platforms. Download them free from the individual stores.

■ Monitoring captured data

Real time captured data can be displayed as digital values in real time on the smart device apps. The saved data on the GL840/GL240 main body can also be displayed in waveform display format.

* Captured data will not be saved on the smart device.

■ Set and control simple functions

Dedicated control features allow remote start and stop, setting the sampling interval, and setting the alarm conditions.

■ Control the settings remotely

Web server function of the GL840/GL240 allows remote control and monitoring using this application.

* Please type "graphtec" to search for the app.

GL840 Main unit specifications	
Item	Description
Model number	GL840-M GL840-WV
Number of analog input channels	20 channels in standard configuration, Expandable up to 200 channels
Number of analog input terminals	Up to 10 terminals (20 channels / terminal), standard config: 1
Type of analog input terminal	Multi-input type, Withstand-voltage type
Port for digital sensor	1 port for the sensor/input terminal/adaptor of the GL100
External input/output *1	Trigger or Sampling (1 channel), Logic/Pulse (4 channels)
Sampling interval	10 ms to 1 hour (10ms to 50ms: voltage only) **, External signal
Time scale of waveform display	1 sec. to 24 hour /division
Trigger, Alarm function	Trigger action: Start or stop capturing data by the trigger Repeat action: Off, On (auto rearm)
Trigger source	Start: Off, Measured signal, Alarm, External, Clock, Week or Time Stop: Off, Measured signal, Alarm, External, Clock, Week or Time
Condition Setting	Combination: OR or AND Analog signal: Rising (High), Falling (Low), Window-in, Window-out Logic signal: Pattern (combination of each input signal in high or low) Pulse (number of count): Rising (High), Falling (Low), Window-in, Window-out
Alarm output	Outputs a signal when alarm condition occurs in the input signal * 5
Pulse input function	Rotation count: Counts the number of pulses per sampling interval and converts to rpm (rotations per minute), Number of pulses for one rotation can be set to 50, 500, 5000, 50k, 500k, 5M, 50M, 500M rpm/F.S. (rpm./Full Scale) Accumulating count mode: Accumulates the number of pulses from the start of measurement 50, 500, 5000, 50k, 500k, 5M, 50M, 500M C/F.S. (Counts/Full Scale) Instant count mode: Counts the number of pulses per sampling interval 50, 500, 5000, 50k, 500k, 5M, 50M, 500M C/F.S. (Counts/Full Scale)
Calculation function	Between channels: Addition, Subtraction, Multiplication, and Division for analog input Statistical: Select two calculations from Average, Peak, Maximum, Minimum, RMS
Search function	Search for analog signal levels, values of logic or pulse or alarm point in captured data
Interface to PC	Ethernet (10 BASE-T/100 BASE-TX), USB (Hi-speed), WLAN (using B-568 option)
Storage device	SD memory card (Support SDHC, up to 32 GB), supports 2 slots * 6
Media	Captured data, Setting conditions, Screen copy
Capturing mode	Mode: Normal, Ring, Relay Ring: Saves most recent data (Number of capturing data: 1000 to 2000000 points) * 7 Relay: Saves data to multiple files without losing data until data capturing is stopped
Replay data	Replays captured data that was saved in the GL840 (in GBD or CSV format)
Scaling (Engineering unit) function	Measured value can be converted to specified engineering unit. • Analog voltage: Converts using four reference points (gain, offset) • Temperature: Converts using two reference points (offset) • Pulse count: Converts using two reference points (gain)
Action during data capture	• Displaying past data (using dual display mode (Current + Past data)) • Hot-swapping the SD memory card • Saving data in between cursors
Display	Size: 7-inch TFT color LCD (WVGA: 800 x 480 dots) Language: English, French, German, Chinese, Korean, Russian, Spanish, Japanese Information * 8: Waveform in Y-T with digital values, Waveform only, Digital value, Digital values and statistics values
Operating environment	0 to 45 °C, 5 to 85 % RH (non condensed) (When operating with battery pack 0 to 40 °C, charging battery 15 to 35 °C)
Power source	AC adapter: 100 to 240 V AC, 50/60 Hz (1 pc of adapter is attached as standard accessory) DC power: 8.5 to 24 V DC (DC drive cable (option B-514) is required) Battery pack: Mountable two battery packs (battery pack (option B-517): 7.2V DC, 2900mAh)
Power consumption * 9	Max. 38 VA
External dimensions (W x D x H in mm, Excluding projections)	Approx. 240 x 158 x 52.5 Approx. 240 x 166 x 52.5
Weight * 10	Approx. 1010 g Approx. 1035 g

Software specifications for PC	
Item	Description
Model name	GL100_240_840-APS
Supported OS	Windows 8.1, 8, 7, Vista (32/64-bit edition)
Supported device	GL840 (USB, Ethernet, WLAN), GL240 (USB, WLAN), GL100 (USB, WLAN)
Functions	Control the GL series, Real-time data capture, Replay data, and Data format conversion
Supported units & channels	Up to 1000 channels total, Up to 4 groups (number of units is limited by model)
Settings control	Input condition, Capturing condition, Trigger/Alarm condition, Report, etc.
Capturing data	Saved to PC: Saves captured data in real time (in GBD binary or CSV format) Saved to GL unit: Saves to the SD memory card (in GBD binary or CSV format)
Displayed information	Y-T waveform, Digital values, Report, X-Y graph (specified period of data, data relay only), Two displays for the current and past data, and Statistical calculation
File operation	Converting data format to CSV from GBD binary, merge multiple data files in the time axis or as an additional channel
Warning function	Send e-mail to the specified address when the alarms occur
Statistical calculation	Maximum, Minimum, and Average during data capturing
Report function	Creates the daily or monthly report automatically

Software specifications for Smart device	
Item	Description
Model name	GL-Connect
Supported OS	Android 4.1 to 4.4, iOS 7/8
Supported device	GL840 (WLAN), GL240 (WLAN), GL100 (WLAN)
Functions	Control the GL series, Display measured data in waveform or digital value
Supported units	Up to 10 units
Settings control	Start/Stop, Sampling interval
Capturing data	Saves captured data in the GL main body (data cannot be saved in the smart device)
Displayed information	Data captured in real time by digital value, Replay the data stored in the GL body by the waveform

Wireless LAN unit (option) specifications	
Item	Description
Model number	B-568
Supported device	GL840, GL240
Communication method	Wireless communication (using radio waves in the 2.4GHz band)
Supported WLAN system	IEEE802.11b/g/n WPS: Push button or PIN method Security protocols: WEP64, WEP128, WPA-PSK/WPA2-PSK, AKIP/AES Communication distance: Approx. 40m (depending on the conditions of radio communication)
Installed location	Attached to the SD CARD slot number 2 on the GL840/GL240 * When the wireless LAN unit is installed, the SD memory card cannot be used in slot number 2
Function	Access Point mode: Communicate with the GL100-WL as a remote sensor (captured data in the GL100-WL is transferred to GL840/GL240) Station mode: Communicate with PC or Smart device (control GL840/GL240 and transfer the data from GL840/GL240)
Connected number of GL100-WL	GL840: Up to 5 units of the GL100-WL GL240: 1 unit of the GL100-WL

GL840 Analog input specifications																																																																														
Item	Description																																																																													
Model number	GL840-M, Input terminal B-564 GL840-WV, Input terminal B-565																																																																													
Input method	All channels isolated balanced input * 11, Scans channels for sampling																																																																													
Type of input terminal	Screw terminal (M3 screw)																																																																													
Measurement range	Voltage: 20, 50, 100, 200, 500 mV, 1, 2, 5, 10, 20, 50, 100 V, and 1-5V F.S. (Full Scale) Thermocouple: Type: K, J, E, T, R, S, B, N, W (WR5-26) Range: 100, 500, 2000 °C * 12 RTD (Resistance Temperature Detector): Type: Pt100, JPt100 (JIS), Pt1000 (IEC751) Range: 100, 500, 2000 °C * 12 Humidity: 0 to 100 % RH - using the humidity sensor (option B-530)																																																																													
Filter	Off, 2, 5, 10, 20, 40 (moving average in selected number)

A/D converter	
Maximum input voltage	Between (+) / (-) terminal: 20 mV to 2 V range: 60 Vp-p Channels (-) / (-) 5 V to 100 V range: 110 Vp-p
Max. voltage (withstand)	Between channels: 600 Vp-p Channel /GND: 600 Vp-p 350 Vp-p (1 minute) Channel /GND: 350 Vp-p (1 minute) 600 Vp-p 2300 Vrms AC (1 minute)

- Input/output cable for GL (option B-513) is required to connect the signal.
- Input signal:
 - Voltage range: Up to 24V (common ground)
 - Signal type: Voltage, Open collector, Contact (relay)
 - Threshold: Approx. ± 2.5 V (Hysteresis: Approx. 0.5V (2.5V to 3V))
- Output signal: Open collector (pull-up to 5V by 10kΩ resistor)
 - <Maximum rating of the output transistor>
 - Voltage: Max. 30V · Current: Max. 0.5A · Collector dissipation: Max. 0.2W
- Minimum interval varies by number of channels used.
- Output port can be specified in each input channel.
- 4GB SD memory card is installed to slot 1 as standard accessory.
- Size of the capture data will be limited to 1/3 of available memory.
- Display mode is switched every time the dedicated key is pressed. In magnified digital value mode, the displayed channel number can be specified. In the waveform display mode, the changing of the time scale will be effective from the point of the next displayed data.
- Rating under maximum power consumption using the AC adapter, with LCD display on, and battery pack(s) being charged.
- Excludes AC adapter and battery pack.
- The terminal "b" for using the RTD is connected each other across all channels.
- If the specifications of the temperature sensor is lesser or greater than the selected measurement range, GL840 can measure up to the specifications of the sensor.
- Subject to the following conditions:
 - Room temperature is 23 °C ± 5 °C.
 - When 30 minutes or more have elapsed after power has turned on.
 - Filter is set to 10.
 - Sampling rate is set to 1 sec, using 20-channel in GL840-M and 10-channel in GL840-WV.
 - GND terminal is connected to ground.
- Wire size of thermocouple used is 0.32mm diameter in the T type and 0.65mm diameter in other types.
- Supports 3-wire type sensor.

Options and Accessories		
Item	Model number	Description
Input terminal (Multi-inputs)	B-564	20ch input terminal, multi-input type
Input terminal (Withstand voltage)	B-565	20ch input terminal, withstand-high-voltage type
Base unit for input terminal	B-566	Base unit for input terminal (B-564 or 566)
Connection cable for extension terminal	B-567-05	Cable to connect GL840 and B-566, 50 cm long
DC drive cable	B-567-20	Cable to connect GL840 and B-566, 2 m long
Wireless LAN unit	B-568	WLAN adapter, IEEE802.11b/g/n
Battery pack	B-569	Rechargeable Lithium-ion battery (7.2 V, 2900mAh)
Bracket for DIN rail (GL840 main body)	B-570	Bracket for DIN rail (GL840 main body), Build-to-order
Bracket for DIN rail (extension terminal)	B-540	Bracket for DIN rail (Input terminal), Build-to-order
Input/output cable for GL series	B-513	2 m long (no clip on end of cable)
DC drive cable	B-514	2 m long (no clip on end of cable)
Humidity sensor	B-530	With 3 m long signal cable (with power plug)
Shunt resistor	B-551-10	250 ohms (it converts the signal to the "1-5V" from the "4-20mA"
AC power adapter	ACADP-20	Input: 100 to 240 V AC · Output: 24 V DC
Temp. & Humidity sensor	GS-TH	Temperature and humidity measurement
Illuminance & UV sensor	GS-LXUV	Illuminance and UV intensity measurement, cable 20cm long
Carbon Dioxide (CO2) sensor	GS-CO2	CO2 measurement, cable 20cm long
Acceleration & Temp sensor	GS-3AT	Acceleration and temperature measurement, cable 20cm long
Thermistor input terminal	GS-4TRS	Temp. measurement (using a Thermistor), cable 20cm long
Thermistor sensor (Normal type)	GS-103AT-4P	Temperature sensor (4-0 to 105 °C), 3m long, 4pcs/lot
Thermistor sensor (Ultrathin type)	GS-103JT-4P	Temperature sensor (4-0 to 120 °C), 3m long, 4pcs/lot
AC current sensor adapter	GS-DPA-AC	Current measurement (using a CT), cable 20cm long
AC current sensor (50A)	GS-AC50A	Current sensor (CT) 50A, cable 20cm long
AC current sensor (100A)	GS-AC100A	Current sensor (CT) 100A, cable 20cm long
AC current sensor (200A)	GS-AC200A	Current sensor (CT) 200A, cable 20cm long
Voltage & Temp input terminal	GS-4VT	Voltage or Temperature (using a thermocouple), cable 20cm long
Module extension cable	GS-EXC	Extension cable for the sensor/terminal/adaptor module, 15m long
Dual port adapter	GS-DPA	Connect up to 2 sensor modules

The information provided herein is to the best of our knowledge true and accurate, it is provided for guidance only. All specifications are subject to change without prior notification.

Althen – Your expert partner in Sensors & Controls | althensensors.com

Althen stands for pioneering measurement and custom sensor solutions. In addition we offer services such as calibration, design & engineering, training and renting of measurement equipment.
